TECHNICAL NOTE

Interlayer Film Manufacturing Quality Management: ISO 9001:2015 Registration Notes for Buyers

By Peter Lin

CNCGLASS · Why a QMS certificate still appears in glazing tenders

Many project quality plans ask whether the interlayer manufacturer runs an ISO 9001 quality management system. This article restates that registration theme under CNCGLASS branding for buyer files.

Tech note (public method context): ISO 9001:2015 is a quality-management-system standard. It certifies process discipline for the approved scope; it is not a product type-test for impact or optics.

CNCGLASS · Scope restated for buyers

Approved scope theme in the source certificate: manufacture of interlayer film for safety laminated glass. Treat CNCGLASS as the commercial brand on buyer-facing documents; do not copy third-party legal names from older scans.

CNCGLASS · Certificate reading tips

- Check issue, renewal, and re-certification dates before attaching a scan to a live tender.
- Confirm the active manufacturing address matches the plant that will ship your film.
- Keep ISO 9001 next to product test articles—never as a substitute for them.

CNCGLASS · What this means for glaziers and buyers

- ISO 9001 supports vendor-quality questionnaires; bake/impact/optical articles support product performance.
- Ask CNCGLASS for the current certificate PDF when a consultant rejects an expired scan.
- Pair QMS evidence with RoHS and product standards in export packs.
