TECHNICAL NOTE

PVB Interlayer Film for Automotive Laminated Glass: Conformity Notes per GB/T 32020-2015

By Peter Lin

CNCGLASS · Automotive PVB still needs a clear national packet

CNCGLASS also supplies PVB interlayer film for automotive laminated glass. This article restates a full-item consignment inspection against GB/T 32020-2015 for colourless 0.76 mm automotive PVB.

Tech note (public method context): GB/T 32020-2015 sets property requirements for polyvinyl butyral interlayer used in laminated glass, including automotive film categories.

CNCGLASS · Product and specimen

Sample: PVB interlayer film for automotive, colourless, film thickness 0.76 mm. Laminated glass structure used where required: 3 mm clear + 0.76 mm PVB + 3 mm clear. Multiple film coupons and laminate coupons submitted. Accept date August 2019; issue September 2019. Report WT20191230.

CNCGLASS · Observed conclusion

Upon testing, the properties of the PVB interlayer film for automobile meet the requirements of the car-film category in GB/T 32020-2015.

Item	Value
Film thickness	0.76 mm
Colour	Colourless
Judgment method	GB/T 32020-2015 car film
Overall	Meets requirements

CNCGLASS · What this means for glaziers and buyers

- Keep automotive PVB packets separate from building SGP packets when tendering.
- 0.76 mm colourless film is the reference gauge in this campaign—confirm other gauges separately.
- Ask CNCGLASS for matching automotive film grades and laminate process notes.
